

Natural Wool Dryer Balls

WOOL DRYER BALLS

Purchase reusable wool dryer balls to use in place of conventional dryer sheets.

Recommend using at least 6 wool balls per large load of laundry.

The wool balls may be scented using 4 drops of desirable essential oil directly applied to the wool balls.

A homemade spray of white vinegar and a desired amount of essential oil can also be used. Place the wool balls in the dryer, spray them with the vinegar spray, then add the clothes. You may also add the clothes first, then the balls and spray everything once it is in the dryer.

Vinegar helps reduce static & acts as a fabric softener, while the essential oil will lightly fragrance your clothes.

By using vinegar in your laundry, the clothes will NOT come out of the dryer smelling like pickles.
