

## HOMEMADE MULTI-PURPOSE HOUSEHOLD CLEANER

This is great to use for cleaning the kitchen, bathroom, most furniture, and other areas of the house. If you notice any residue after cleaning, simply decrease the amount of dish soap used (this varies depending upon the type of dish soap used). The rubbing alcohol provides a streak-free shine with disinfectant properties.

Here's what you'll need:

SPRAY BOTTLE (32 oz)

1-2 TABLESPOONS OF DISH SOAP

½ CUP ISOPROPYL RUBBING ALCOHOL (AT LEAST 70%)

WATER

To the spray bottle, add the rubbing alcohol, dish soap, and enough water to fill the spray bottle. Add the water slowly as to not create excess suds from the soap.

\*You may also add the soap last after mostly filling the bottle with water. This prevents excess suds from forming.

Apply the sprayer top and gently swirl the bottle to mix the ingredients. You're ready to begin using this multi-purpose cleaner to clean your home.

Using a microfiber cloth to clean is recommended.
