

Fabric Softener

NATURAL FABRIC SOFTENER

Distilled White Vinegar (5% acidity)

Water

Storage Jug

Make a 50:50 mixture of white vinegar and water. Add 1/2 cup of the vinegar mixture to the fabric softener dispenser in your washing machine or add it during the rinse cycle of the washing process.

White vinegar softens clothes, leaving clothes smelling fresh while removing and preventing mildew odors. It also keeps your washing machine smelling fresh and removes any built-up soap residue (both in your washing machine and on your clothes).

NOTE

Make sure to use only white vinegar, NOT apple cider vinegar. Apple cider vinegar contains brown tannins that can stain fabrics. Use white vinegar for all your cleaning needs.
